THE SWEET SIDE OF WELLNESS

CHOCOLATE BASED FOOD SUPPLEMENTS

OUR COMPANIES

Through our companies, we are able to supply a wide range of chocolate foods, food supplements and functional foods.

La via naturale

LAERBIUM Pharma was founded in 1999 by the passion of a group of university researchers. Since 2011 we have produced a wide range of functional chocolate products such as: sugar free chocolate, raw chocolate, chocolate enriched with probiotics or other functional ingredients.

DULCINEA LAB. with its lasting commitment of more than 10 years in research and development, is passionately dedicated to revolutionising a classic and traditional product like chocolate by transforming it into an authentic "super food".

"Bontà e Salute" is the only product line available in Pharmacies that combines chocolate and wellness. We produce high-quality products made for those who want to finally enjoy the taste of real artisanal chocolate without sacrifices.

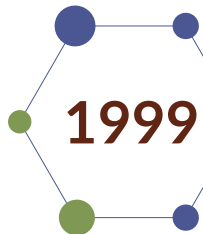

DULCINEA PERUGIA, is a small workshop in the heart of Umbria, where expert craftsmanship and modern technologies are combined to create unique and astonishing products. A craftsmanship which reminds of ancient traditions, childhood memories and the good things in life.

COMPANY ROADMAP

1999

Laerbium Pharma was founded by the passion of a group of university researchers.

Why your next supplement should be made with chocolate

- **Versatile Matrix**
Chocolate can carry a wide range of active ingredients, just like traditional supplement forms.
- **Co-Protagonist, Not Just Excipient**
Chocolate enhances your product, not just fills space. Offer your target audience unique options: organic, sugar-free, single-origin, and more.
- **Superfood Status**
Modern science proves chocolate's health benefits, dispelling old myths.
- **Balanced Nutrition**
Despite its calories (500kcal/100g), chocolate offers good fats, proteins, vitamins, minerals, and beneficial compounds like theobromine.
- **Boost Compliance**
Consumers see chocolate supplements as a treat, not a chore, improving adherence.
- **Innovation**
Stand out from competitors with this novel delivery format, moving beyond gummies and shots.
- **Preservation**
The anhydrous matrix of chocolate naturally preserves nutrients, extracts, and probiotics, often eliminating the need for preservatives.
- **Regulatory Advantages**
In some markets, chocolate supplements enjoy easier regulatory pathways as food products.
- **Taste Masking**
Chocolate naturally masks unpleasant flavors of active ingredients, reducing the need for artificial flavoring.
- **Appeals to All Ages**
While loved by children, high-quality dark chocolate also entices adult consumers.
- **Format Flexibility**
Chocolate conforms to any mold, offering endless shapes and sizes for your product.
- **Accessible Minimum Orders**
Our production allows for small test batches, scaling up as needed.

Ready to explore the possibilities?
Let's discuss your next chocolate supplement!
