

# Build your **extra virgin** with us

Since more than 50 years, the company deals with the bottling of high quality extra virgin olive oils with private labels, aiming to meet, with production flexibility, the different needs of the costumers.

Thanks to the long experience on national and international markets and the direct relations with production, the company is able to meet the highest standards for traceability, innovative packaging, consistent quality of raw material and efficient service.

It also provides its customers with accurate checks throughout the entire supply chain, cup-to-date laboratory analyses and support in matters relating to labelling regulations.

## PROCESSING

|             |  |
|-------------|--|
| UN-FILTERED | Bottled as it comes out of the oil mill without any type of filtration. It has a cloudy appearance due to the tiny particles of olive and emulsified water that remain in suspension after the olive oil has been extracted. |
| FILTERED    | Filtration is carried out with the aid of fossil flours and cellulose. It has a clear and bright appearance.   |
